

METROPOLITAN HEALTH SYSTEM - FORMAL DRUG DEFECT REPORT

Department of Quality Assurance & Sterile Compounding Inspection

DATE: July 27, 2026

TO: Global Regulatory Affairs & Quality Compliance Division

SUBJECT: Formal Product Quality Complaint - NeuroCalm Injectable Solution USP

1. PRODUCT IDENTIFICATION DETAILS

Product Name: NeuroCalm Injection (Diazepam Injection USP)

Dosage Form & Strength: Parenteral Solution, 5mg/mL

Batch / Lot Number: BATCH-88402X

National Drug Code (NDC): 55150-123-10

Manufacture Date: 2025-06-10 | **Expiration Date:** 2026-12-31

Affected Quantity: 2 cartons / 10 glass ampoules

2. DEFECT NARRATIVE & QUALITY DEVIATION

Upon opening outer corrugated shipment packaging at Metropolitan Central Hospital Pharmacy, inspection personnel identified hairline glass cracks along the neck constriction of two intact 5mg/mL ampoules. Fluid leakage was observed inside the plastic tray liner, compromising container closure integrity and sterile assurance.

3. COMPLAINANT METADATA

Reporting Official: Mark Stevens, Lead Quality Inspector

Facility: Metropolitan Central Hospital Pharmacy

Contact Email: m.stevens@metrohealth.org | **Phone:** (555) 234-5678

4. SAFETY RISK EVALUATION

Sterility breach in parenteral injectable preparations constitutes a Class I FDA Recall hazard due to potential microbial proliferation or glass particulate injection risks. Physical samples have been isolated in protective secondary container.
